0800-01-01-.05 APPLICABILITY OF STANDARDS.

(1) Except as provided in paragraph (2) of this rule, the standards contained in this chapter shall apply with respect to employments performed in all workplaces in the State of Tennessee.

(2) None of the standards in this chapter shall apply to working conditions of employees exempted from coverage under the Act. These are:

(a) Employees of the federal government, including its departments, agencies and instrumentalities;

(b) Employees whose safety and health are subject to protection under the Atomic Energy Act of 1954, as amended (42 USC §§ 2011-2296);

(c) Employees whose safety and health are subject to protection under the federal Coal Mine Health and Safety Act of 1969 (30 USC §§ 801 et seq.), the federal Metal and Nonmetallic Mine Safety Act (30 USC §§ 725) [repealed], or Tennessee Code Annotated, Title 59;

(d) Railroad employees whose safety and health are subject to protection under the federal Safety Appliances Act (45 USC §§ 1 et seq.) or the federal Railroad Safety Act of 1970 (45 USC §§ 431-441);

(e) Domestic workers; and

(f) RESERVED

(g) Any employee engaged in agriculture who is employed on a farm, each of the employees of which is related to the employer as a spouse, child, parent, grandparent or grandchild.

(3) Applicability of specific vs. general standards.

(a) If a particular standard is specifically applicable to a condition, practice, means, method, operation or process, it shall prevail over any different general standard which might otherwise be applicable to the same condition, practice, means, method, operation or process. For example, the standard 29 CFR 1910.217 as adopted by rules of this chapter prescribes guarding for mechanical power presses. Such a standard shall apply, and shall not be deemed modified or superseded by any different general standard whose provisions might otherwise be applicable, such as the standard 29 CFR 1910.212 as adopted by rules of this chapter which prescribes general requirements for all machines.

(Rule 0800-01-01-.05, continued)

(b) On the other hand, any standard shall apply according to its terms to any employment and place of employment in any industry, as standards 29 CFR 1910.261 through 29 CFR 1910.272 (Appendix C) as adopted by rules of this chapter or 29 CFR 1926 as adopted by rules in Chapter 0800-01-06. For example, the general standard regarding noise exposure, 29 CFR 1910.95 as adopted by rules of this chapter, applies to employments and places of employment in pulp, paper and paperboard mills covered by the standard 29 CFR 1910.261 as adopted by rules of this chapter.

(4) In the event a standard protects on its face a class of persons larger than employees, the standard shall be applicable under the Act only to those employees and their employment and places of employment.

(5) An employer who is in compliance with any standard in this chapter shall be deemed to be in compliance with the requirement of T.C.A. § 50-3-105(1), but only to the extent of the condition, practice, means, method, operation or process covered by the standard.

Authority: *T.C.A. §§ 4-3-1411, 50-3-105, and 50-3-201.* ***Administrative History:*** *Original rule filed September 14, 1976; effective October 14, 1976. (2) In lieu of the current federal occupational safety and health standards codified in Title 29, Code of Federal Regulations, Part 1910, Rule 0800-01-01-.06 of this chapter, or the absence thereof because of repeal or revocation, the Commissioner of Labor and Workforce Development adopts the standards limiting exposure to air contaminants as contained in subparagraph (b) of this rule. The information contained therein was compiled and adopted from the following federal occupational safety and health standards as published in the Federal Register in the volume and on the page(s) indicated.

(a) 29 CFR 1910.1000 at 54 FR 2920-2983 and the following corrections and amendments thereto:

8. 29 CFR 1910.1000 at 55 FR 19259.

9. 29 CFR 1910.1000 at 55 FR 46950.

10. 29 CFR 1910.1000 at 57 FR 29204-29206.

11. 29 CFR 1910.1000 at 57 FR 42388-42389.

(b) Subpart Z - Toxic and Hazardous Substances 29 CFR 1910.1000 - Air Contaminants as adopted by subparagraph (a) of this rule reads as follows: An employee's exposure to any substance listed in Table Z-1-A shall be limited in accordance with the following requirements:

1. Limits for Air Contaminants Columns. An employee's exposure to any substance listed in Table Z-1-A shall not exceed the Time Weighted Average (TWA), Short Term Exposure Limit (STEL) and Ceiling Limit specified for that substance in Table Z-1-A.

2. Skin Designation. To prevent or reduce skin absorption, an employee's skin exposure to substances listed in Table Z-1-A with an "X" in the Skin Designation column following the substance name shall be prevented or reduced to the extent necessary in the circumstances through the use of gloves, coveralls, goggles, or other appropriate personal protective equipment, engineering controls or work practices.

3. Definitions. The following definitions are applicable to the limits for air contaminants columns of Table Z-1-A:

(i) Time weighted average (TWA) is the employee's average airborne exposure in any 8-hour work shift of a 40-hour work week which shall not be exceeded.

(ii) Short term exposure limit (STEL) is the employee's 15-minute time weighted average exposure which shall not be exceeded at any time during the work day unless another time limit is specified in a parenthetical notation below the limit. If another time period is specified, the time weighted average exposure over that time period shall not be exceeded at any time during the working day.

(iii) Ceiling is the employee's exposure which shall not be exceeded during any part of the work day. If instantaneous monitoring is not feasible, then the ceiling shall be assessed as a 15-minute time weighted average exposure which shall not be exceeded at any time over a working day.

4. Additional Definition. The terms "substance", "air contaminant", and "material" are equivalent in meaning for 29 CFR 1910.1000.

(c) Computation formulae. The computation formula which shall apply to employee exposure to more than one substance for which 8-hour time weighted averages are listed in Subpart Z of 29 CFR Part 1910 in order to determine whether an employee is exposed over the regulatory limit is as follows:

(Rule 0800-01-01-.07, continued)

1. The cumulative exposure for an 8-hour work shift shall be computed as follows: E = (CaTa + CbTb + . . . CnTn) ÷ 8

   Where:

   E is the equivalent exposure for the working shift.
   C is the concentration during any period of time.
   T where the concentration remains constant.
   T is the duration in hours of the exposure at the concentration C.

2. To illustrate the formula prescribed above, assume that Substance A has an 8-hour time weighted average limit of 100 ppm noted in Table Z-1-A. Assume that an employee is subject to the following exposure:

   Two hours exposure at 150 ppm
   Two hours exposure at 75 ppm
   Four hours exposure at 50 ppm

   The value of E shall not exceed the 8-hour time weighted average specified in Subpart Z of 29 CFR Part 1910 for the material involved.

   Substituting this information in the formula, we have:
   (2 x 150 + 2 x 75 + 4 x 50) ÷ 8 = 81.25 ppm.

   Since 81.25 ppm is less than 100 ppm, the 8-hour time weighted average limit, the exposure is acceptable.

3. In case of a mixture of air contaminants, an employer shall compute the equivalent exposure as follows: Em = (C1 ÷ L1) + (C2 ÷ L2) + . . . (Cn ÷ Ln)

   Where:

   Em is the equivalent exposure for the mixture.
   C is the concentration of a particular contaminant.
   L is the exposure limit for that substance specified in Subpart Z of 29 CFR Part 1910.
   The value of Em shall not exceed unity (1).

4. To illustrate the formula prescribed above, consider the following exposures:

Substance	Actual concentration of 8 hour exposure (ppm)	8 hr. TWA PEL (ppm)
B	500	1000
C	45	200
D	40	200

   Substituting in the formula, we have: Em = 500 ÷ 1000 + 45 ÷ 200 + 40 ÷ 200
   Em = 0.500 + 0.225 + 0.200
   Em = 0.925

   Since Em is less than unity (1), the exposure combination is within acceptable limits.

(Rule 0800-01-01-.07, continued)

(d) To achieve compliance with subparagraphs (b) and (c) of this rule, administrative or engineering controls must first be determined and implemented whenever feasible. When such controls are not feasible to achieve full compliance, protective equipment or any other protective measures shall be used to keep the exposure of employees to air contaminants within the limits prescribed herein. Any equipment and/or technical measures used for this purpose must be approved for each particular use by a competent industrial hygienist or other technically qualified person. Whenever respirators are used, their use shall comply with 29 CFR 1910.134.

(e) Note: Abbreviations used in Table Z-1-A.

1. As determined from breathing-zone air samples:

(i) ppm - Parts of vapor or gas per million parts of contaminated air by volume at 25 degrees C and 760 torr.

(ii) mg/m3 - Approximate milligrams of substance per cubic meter of air.

(iii) STEL - Short Term Exposure Limit, duration is 15 minutes, unless otherwise noted.

2. CAS No. - Chemical Abstract Service Number, the CAS number is for information only. Enforcement is based on the substance name. For an entry covering more than one metal compound measured as the metal, the CAS number for the metal is given—not the CAS numbers for the individual compounds.
